

# nginx server to html && docker images && Jenkins && tomcatapplication

from nginx server to html

The screenshot displays the Docker Desktop application interface. At the top, a terminal window shows the execution of a Docker push command for the image 'arunesh2005/simpleapplication'. The output indicates that the image was successfully pushed to the Docker Hub repository, with a digest of 'sha256:b221b7b8241817f21eb35059fd302c63ec9b0cc5877e57c32ab6b0c687a48ac' and a size of 1365 bytes. The terminal also shows the pipeline steps: 'withDockerRegistry', 'script', 'stage', and 'node', all of which completed successfully.

Below the terminal, the Docker Desktop interface is visible. The left sidebar shows the 'Images' section selected. The main area displays the 'Images' page, which lists local and hub repositories. The 'Local' tab is active, showing a list of images with columns for Name, Tag, Image ID, Created, Size, and Actions. The list includes images like 'nginx-web', 'web-tomcat', 'ubuntu/apache2', 'nginx', 'hello-world', and 'arunesh2005/simpleapplication'. The 'arunesh2005/simpleapplication' image is highlighted in blue, indicating it is the selected image.

| Name                          | Tag    | Image ID     | Created        | Size      | Actions               |
|-------------------------------|--------|--------------|----------------|-----------|-----------------------|
| nginx-web                     | latest | cb83dd532f24 | 6 hours ago    | 192 MB    | [Play] [List] [Trash] |
